

# Experiment 3

## Provisioning an EC2 Instance on

### AWS

## Prerequisites

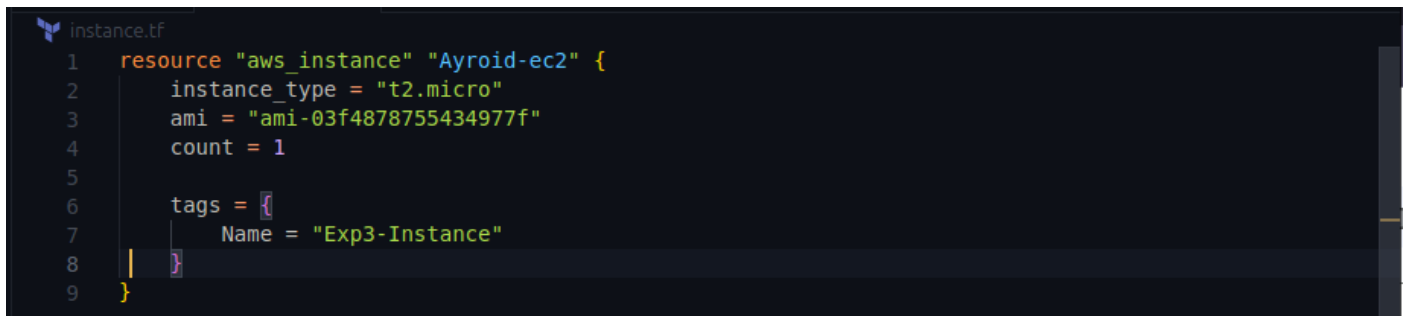

Terraform Installed & AWS Credentials.

## Aim

Provisioning an EC2 Instance on AWS

## Steps

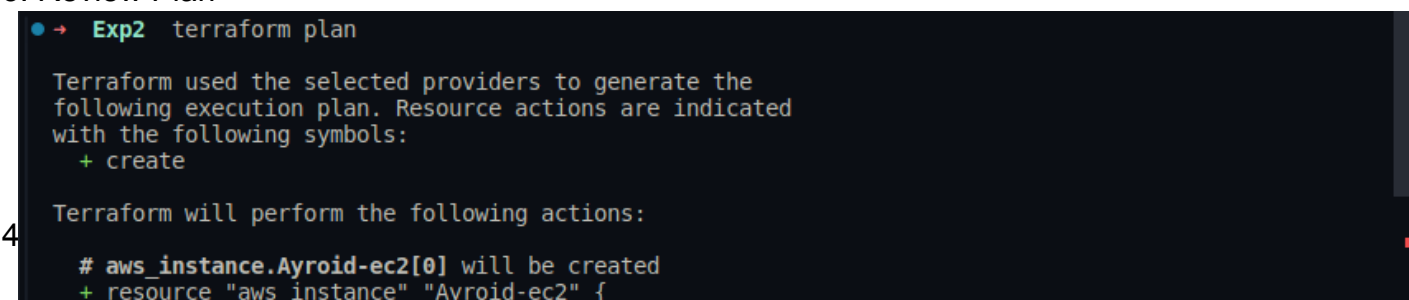

1. Create a terraform configuration file for EC2 Instance (instance.tf)

2. Validate the configuration

3. Review Plan

```

• → Exp2 terraform apply

Terraform used the selected providers to generate the following execution plan.
Resource actions are indicated with the following symbols:
+ create

Terraform will perform the following actions:

# aws_instance.Ayroid-ec2[0] will be created
+ resource "aws_instance" "Ayroid-ec2" {
  + ami                                = "ami-03f4878755434977f"

```

```

Plan: 1 to add, 0 to change, 0 to destroy.

Do you want to perform these actions?
Terraform will perform the actions described above.
Only 'yes' will be accepted to approve.

Enter a value: yes

aws_instance.Ayroid-ec2[0]: Creating...
aws_instance.Ayroid-ec2[0]: Still creating... [10s elapsed]
aws_instance.Ayroid-ec2[0]: Still creating... [20s elapsed]
aws_instance.Ayroid-ec2[0]: Still creating... [30s elapsed]
aws_instance.Ayroid-ec2[0]: Creation complete after 34s [id=i-0688471057f5dbedd]

Apply complete! Resources: 1 added, 0 changed, 0 destroyed.

```

## 5. Verify Resources

Instances (1) <a href="#">Info</a>								
<input type="text" value="Find Instance by attribute or tag (case-sensitive)"/>								
<input type="checkbox"/>	Name 	Instance ID	Instance state 	Instance type 	Status check	Alarm status	Availability zone	
<input type="checkbox"/>	Exp3-Instance	<a href="#">i-0688471057f5dbedd</a>	 Pending  	t2.micro	-	<a href="#">View alarms</a> 	ap-south-1a	

## 6. Cleanup Resources

```

• → Exp2 terraform destroy
aws_instance.Ayroid-ec2[0]: Refreshing state... [id=i-0688471057f5dbedd]

Terraform used the selected
providers to generate the
following execution plan.
Resource actions are indicated
with the following symbols:
- destroy

Terraform will perform the following actions:

# aws_instance.Ayroid-ec2[0] will be destroyed
- resource "aws_instance" "Ayroid-ec2" {
  - ami                                = "ami-03f4878755434977f" -> null
  - arn                                = "arn:aws:ec2:ap-south-1:851931352354:instance/i-0688471057f5dbedd"
}

Plan: 0 to add, 0 to change, 1 to destroy.

Do you really want to destroy all resources?
Terraform will destroy all your managed infrastructure, as shown above.
There is no undo. Only 'yes' will be accepted to confirm.

Enter a value: yes

aws_instance.Ayroid-ec2[0]: Destroying... [id=i-0688471057f5dbedd]
aws_instance.Ayroid-ec2[0]: Still destroying... [id=i-0688471057f5dbedd, 10s elapsed]
aws_instance.Ayroid-ec2[0]: Still destroying... [id=i-0688471057f5dbedd, 20s elapsed]
aws_instance.Ayroid-ec2[0]: Still destroying... [id=i-0688471057f5dbedd, 30s elapsed]
aws_instance.Ayroid-ec2[0]: Destruction complete after 31s

Destroy complete! Resources: 1 destroyed.
• → Exp2

```
