# SPCM-LAB-EXP1

**AIM:-** To install the Terraform.

1) Open the Terminal and run these commands to install terraform.

```
Last login: Fri Jan 19 21:55:19 on ttys000
→  ~  brew tap hashicorp/tap

[→  ~  brew install hashicorp/tap/terraform
Warning: hashicorp/tap/terraform 1.7.0 is already installed and up-to-date.
To reinstall 1.7.0, run:
  brew reinstall terraform
→  ~  ▊
```

2) Now check the version of terraform on terminal.

```
[→  ~  terraform --version
Terraform v1.7.0
on darwin_arm64
→  ~  ▊
```

Now, the terraform is installed successfully on your system.
